

To whom it may concern:

I am an XM Satellite Radio subscriber and have been for nearly a year. I live and work just outside of Washington, DC in Northern Virginia. As such, the length of my daily commute is dictated by the famously jammed highways around the beltway. I was overjoyed when XM began offering local traffic and weather to my service. I use XM's traffic reports to navigate around the frequent delays in this region and like that I don't have to wait to get my traffic. It's instant, and that is something that no other (AM/FM) radio service can offer.

XM's traffic service is just one of the reason's I pay a monthly subscription. The way I see it, since I pay for this servicethe FCC and the National Association of Broadcasters (NAB) should not interfere with what I want to hear. That is why I'm writing the letter. I respectfully urge the FCC to reject the NAB's petition 04-160. I support and trust XM's ability to provide the kind of programming that I demand and deserve.

Sincerely,  
Todd Peterson
